Basic lines....

It has been procured under a new Multi Project Procurement (MPP) model which encourages long-term collaboration throughout the supply chain, enhanced project delivery, and paves the way for greater economic and social impact in the West Cumbria region.

The MPP model will see the appointment of Key Delivery Partners (KDPs) to deliver work packages covering everything from building fit out, groundworks and general civils to steelwork and cladding.

PPP will work closely with all Key Delivery Partners to deliver its ambition to create a clean and safe environment at the Sellafield site for future generations, improve sustainability and better outcomes for the local economy and communities.

The PPP approach is a first of its kind, developed with a heavy focus on collaborative working, to draw on the unique expertise brought from each partnering organisation. It is already helping to achieve significant 'firsts' for the nuclear industry.

With more than 100 years of work ahead at the site, Sellafield is becoming one of the largest infrastructure projects in the north, generating growth and employment in Cumbria, the North-West of England and beyond.

Press Release

Sellafield Ltd is the 5th partner.

The Programme and Project Partners (PPP) model was mobilised in 2019 with the purpose of transforming major project delivery at the Sellafield nuclear site. The partnership brings together the best of KBR, Jacobs, Morgan Sindall Infrastructure, Altrad Babcock and Sellafield Ltd to deliver a 20-year pipeline of major infrastructure projects to support the decommissioning of Sellafield and to create a clean and safe environment for future generations.

As part of its pioneering approach to project delivery and local impact, Programme and Project Partners is supporting relationships between those bidding to become key delivery partners and high performing small and medium-sized enterprises (SMEs) willing to invest in West Cumbria.

These SMEs plan to create additional jobs, recruit apprentices and invest to expand/create new facilities in the West Cumbria as a result of the work they do with their respective key delivery partners.
